

# Control units for roller doors

applicable for tubular motors up to max. 600 W, AC 230 V (item no. 5420V000)

## „RDC vision“

- ▶ design-housing with integrated illumination
- ▶ integrated radio receiver FM 868.8 MHz with memory capacity for 112 radio codes
- ▶ integrated 3-button on control (selective up-stop-down)
- ▶ very simple programmable control unit
- ▶ radio receiver for individual programming of transmitters for up-stop-down-partial opening function
- ▶ pre-formed plug for a quick and easy connection
- ▶ the use of pre-formed connection cable is possible thanks to pluggable screw terminal and cable lead-through
- ▶ various connection possibilities: e.g. external illumination 40 W or floating relay contact for door status display max. 60 V / 1 A
- ▶ several adjustment possibilities per DIP-switch or TorMinal
- ▶ for private and commercial applications

## „RDC 800“

- ▶ integrated radio receiver FM 868.8 MHz with memory capacity for 112 radio codes
- ▶ integrated 3-button on control (selective up-stop-down)
- ▶ very simple programmable control unit
- ▶ radio receiver for individual programming of transmitters for up-stop-down-partial opening function
- ▶ various connection possibilities: e.g. external illumination 40 W or floating relay contact for door status display max. 60 V / 1 A
- ▶ several adjustment possibilities per DIP-switch or TorMinal
- ▶ for private and commercial applications

applicable for tubular motors up to max. 800 W, AC 230 V (item no. 5851V000)
