General information

Information on the Installation and Operating Manual
Version of the installation and operating manual:

SOMMERsuite_S12157-00001_122019_0-DRE_Rev-A_EN

Warranty
The warranty complies with statutory requirements. The contact person for warranties is the qualified dealer. The warranty is only valid in the country in which the operator was purchased. There is no warranty for consumables such as batteries, accumulators and safety products as well as light bulbs. This also applies for wear parts. The operator is only designed for a limited frequency of use. More frequent use leads to increased wear.

Contact data
If you require after-sales service, spare parts or accessories, please contact your qualified specialist retailer or installer.

Feedback on this Installation and Operating Manual
We have tried to make the Installation and Operating Manual as easy as possible to follow. If you have any suggestions as to how we could improve it or if you think more information is needed, please send your suggestions to us:

SOMMERsuite

About this manual

This manual describes:

- download and installation of the computer program required to update the SOMlink and Codemaster+ software.

  ⇒ Need only be performed once and can be skipped during future updates.

- Carrying out a software update on the SOMlink and Codemaster+.

Product description

The SOMMERsuite is a software program for the management of the SOMMER products SOMlink and Codemaster+.

The following options are available for both devices:

Updater

- Checks whether a firmware update is available for the product
- Downloads updates to the computer
- Transfers updates to the respective product

Backup (creating data backup)

➡ **NOTE**

The operator of the Codemaster+ is responsible for creating data backup. We recommend that you create backup copies of the data at regular intervals.
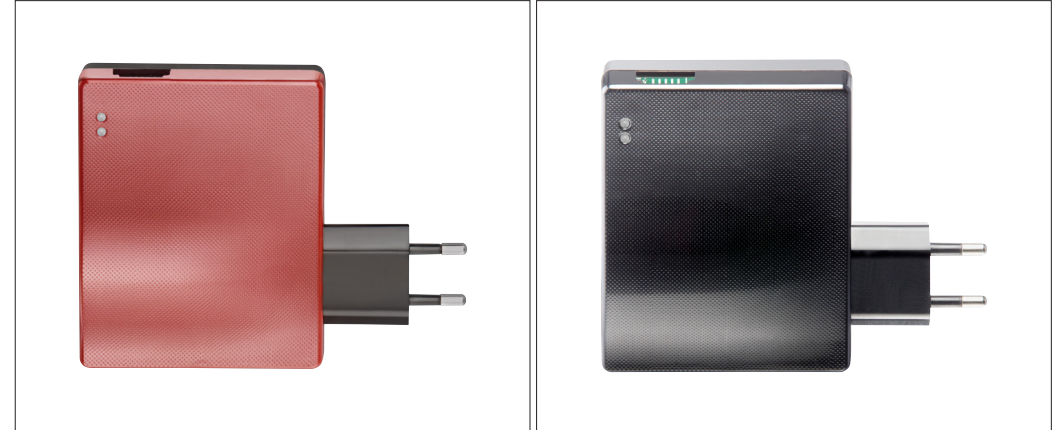

- Create backup function:

Creates a backup copy of the object data stored on the Codemaster+ and saves it to the computer.

- Restore backup function:

Restores previously created data backups on the Codemaster+.

Requirements

The following criteria must be fulfilled in order to install and use SOMMERsuite:

- WiFi-compatible end device with MS Windows 7 or higher
- Internet connection
- Administrator rights for the end device
- SOMlink or Codemaster+ from firmware version v03.05.18

➡ **NOTE**

To carry out an update or create backup, the SOMlink or Codemaster+ must be plugged into a power outlet and be within WiFi range.

SOMMERsuite

Download

SOMMERsuite can be downloaded via this link:

som4.me/sommersuite

• Click the link and download SOMMERsuite.

Installation

1. De-install any older version.

2. Run the downloaded file "SOMMERsuiteSetup.exe"

3. Install SOMMERsuite.
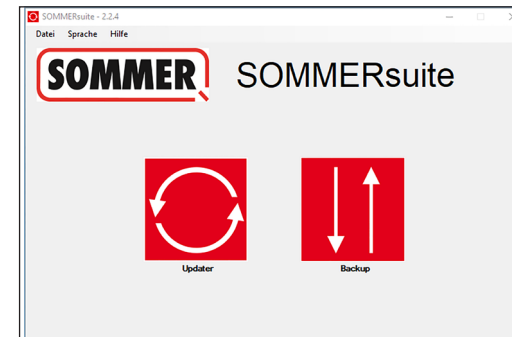

➡ **NOTE**

If a version of SOMMERsuite is already installed, it will be updated automatically when the program is started if an update is available.
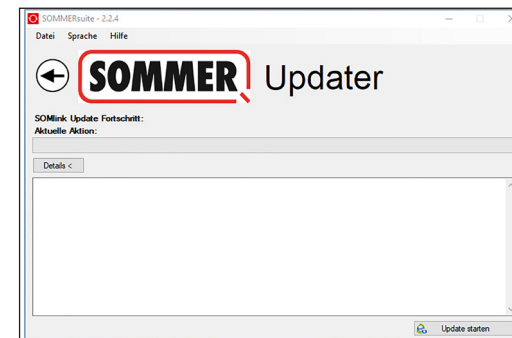

Performing an update

➡ **NOTE**
   ► **Other end devices which could connect to the SOMlink or Codemaster+ should be switched off during the update process.**
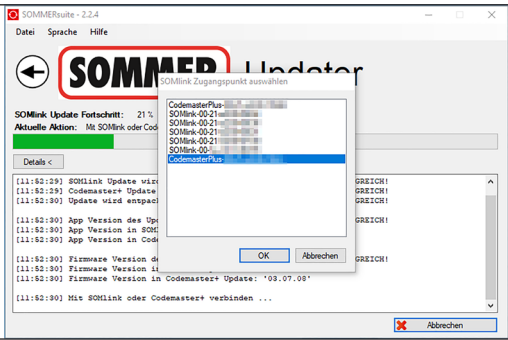

1. Start SOMMERsuite.

2. Select the "Updater" button.

ℹ️ **Internet connection must be established!**

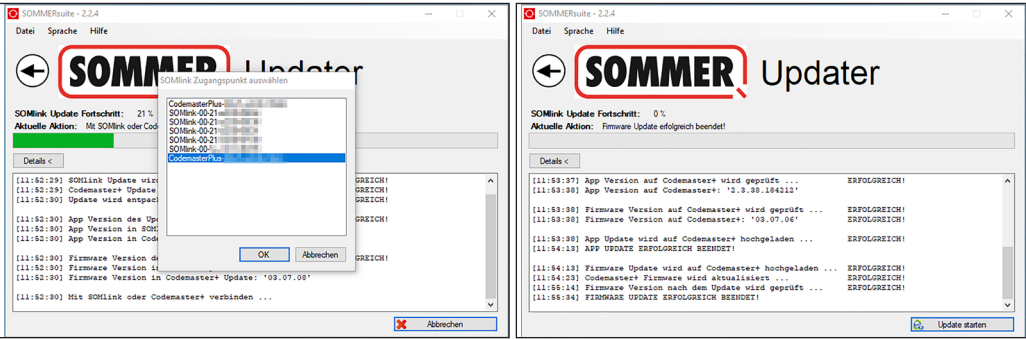

3. Click "Start Update."

SOMMERsuite

4. Select the device on which the update is to be installed.

5. Where applicable, enter password and confirm with "OK."

⇒ The update process runs automatically.

6. Delete temporary data (cache, cookies etc.) in the browser.

Creating backup

7. Select the "Backup" button.

8. Select the device for which data backup is to be performed.

9. Enter password where applicable.

10. Click "Create backup."

SOMMERsuite

⇒ The backup process runs automatically.

⇒ Data set appears in the list with the date of creation.
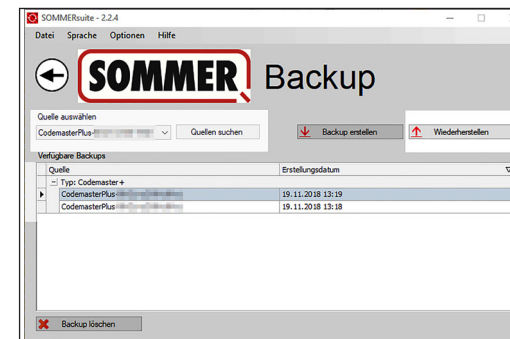

Restore backup

NOTE

**All data on the device are overwritten when restoring backup.**

11. Select the "Backup" button.

12. Select the device on which the data are to be restored (source).

13. Select the desired data set from the list.

14. Click "Restore."

SOMMERsuite

⇒ Data are transferred to the device.
